

# Opening of the LIT Secure and Correct Systems Lab

The LIT Secure and Correct Systems Lab cordially invites everyone to our official opening – providing a program with exciting lectures and small live hacking demos.

Upper Austria wants to position itself as an "Information Security Region" and become an internationally visible hot spot in this area. With the help of the IT Cluster, in which the Johannes Kepler University Linz is significantly involved, Upper Austria is to achieve this status.

The **LIT Secure and Correct Systems Lab** at the JKU – an interdisciplinary research platform combining the expertise of nine different institutes– forms an essential pillar in this context. The goal is to bundle competence and expertise from different disciplines, to promote synergies and potentials, as well as to be available as a central point of contact for industry | Upper Austria and beyond.

To present our work, we cordially invite you to the **opening** of the LIT Lab on **October 17** and request [registration until October 11, 2019](#).
